Dated 27th June, 2024

The Commissioner of Fisheries,

Government of Maharashtra

MUMBAI 400 002

Sub: Fishery Improvement Project (FIP) on Indian oil sardine & Indian mackerel along the coast of Maharashtra & Goa- Regarding development of Fisheries Management plan for Maharashtra.

Sir,

Please recall the tele discussion today we had on the above subject and our earlier requests. As you are aware M/s Omega Fishmeal & Oil Pvt. Ltd Ratnagiri is one of the leading exporters of fishmeal & fish oil from the country. We also supply fishmeal to major aquaculture feed manufactures in India for the production of fish/shrimp feeds. The major raw material what we used for the production are Indian oil sardine & Indian mackerel caught from the waters of Maharashtra and Goa.

In order to promote the export/sale of our products abroad and in India, we commenced the "Fishery Improvement Project" (FIP) for Indian oil sardine and Indian mackerel along the coastal waters of Maharashtra, & Goa in 2017. The project's main focus is to improve the living conditions and efficiency of fishermen, better fisheries management and governance together with environmental responsibility and transparent traceability of fishery products throughout the supply chain.

This is the first FIP in India that applies to the latest version of Marin Trust Standard, which is an internationally accepted standard designed specifically for responsible fisheries according to UN FAO requirements .The Marin Trust Standard is most suitable for the marine fisheries resource management in India since Indian waters are found with multi-species fish stock. This FIP will ensure the effective management of sardine & mackerel resources for the development of fisheries aimed at maximum sustainability. It is worth mention here that our processing facility has been officially accepted into the Marin Trust Improver Programme (MARINTRUST IP) after auditing our unit. This is the first fishmeal plant in India getting such approval. The Marin Trust Improver Programme is an initiative of Marine Ingredients Certification Ltd. that was developed by the Marin Trust Governing Body Committee with the aim of encouraging factories for meeting the required standard for certification.

An update of the FIP is attached for your kind reference – Annexure 1

We would like to bring your kind notice that an effective Marine Fisheries Management Plan encompassing purse seine fisheries for small pelagic by the Department of Fisheries is essential to enable us to move forward and make our FIP successful. This is an integral part of our Fishery Action Plan. As you are aware, though India is a signatory to the FAO Code of Conduct for the Responsible Fisheries (CCRF) brought out in 1995 to serve as a guidelines for countries for the sound and effective management of fisheries resources, its compliance is not up to the expected level due to various

reasons. The Code is voluntary. In order to make it India friendly, our scientists from CMFRI & CIFT developed guidelines namely Indian Marine Fisheries Code (IMFC) for the good management of the fishery by each maritime state. . CMFRI Kochi has already prepared the Management plans for the states of Gujarat, Tamil Nadu & Karnataka.

Some of the potential benefits of developing a fishery management plan for the small pelagic purse seine fisheries in Maharashtra will help the implementation of National Fisheries Policy 2017. Fishery management plan represent best practice in the following ways:

1. Provide clarity for all those involved in the fishery (including those that depend on the catch) about the objectives, rules/regulations, catch sharing arrangements and sustainability measures all work together.
2. Provide opportunities for stakeholders to be involved in the decision making process. Increasing transparency helps build support amongst interested parties as well as accountability.
3. Ensure that information collection is focused on supporting management and those that depend on the fishery.
4. Provide certainty and investment confidence for the post-harvest sector if sustainable use is achieved.

In view of the importance of good governance for a well-managed fisheries in line with our National Fisheries Policy, we request you to evolve a suitable marine fisheries management plan for purse seines for small pelagic

in Maharashtra at the earliest. This will help us to fulfill our efforts to make the FIP successful. I will be happy to visit your office on a date convenient to you for a detailed discussion on the subject.

Awaiting for your kind response at the earliest.

With respectful regards,

Manoj Kushe

Respected Sir,

Kindly refer our email/letters dated 16/01/2023, 18/4/2023, 26/7/2023, 04/9/2023, 28/6/2024 and few meetings at your office requesting for the Marine Fisheries Management Plan for Maharashtra to be prepared by CMFRI in connection with the Fishery Improvement Project (FIP) on Indian oil sardine and Indian mackerel along the coastal waters of Goa & Maharashtra.

In this context, we had an online meeting with Dr. Grinson George, Director CMFRI on 22/8/2024 and appraised him of the progress of our FIP. During the course of discussion, we were informed that CMFRI Mumbai Division has already prepared the Management plan for Maharashtra and the same is under review.

Now we have to submit the Annual Report to Marin Trust for assessing the progress of the FIP we made so far by 15th October 2024. Progress on the preparation of management plan forms an integral part of the Report. Any communication from CMFRI to the Commissionerate of Fisheries on the progress of the subject is good evidence to prove that we are on the right direction and the report will be ready soon.

We shall be grateful if you could kindly take up the matter with Director CMFRI Kochi and ensure the completion/ publication of the Management Plan at the earliest. In the meanwhile, if you have received any information from CMFRI Kochi, on the subject kindly spare a copy of the same to us at the earliest for framing the Annual Report to Marin Trust.

Sub: FIP on Indian oil sardine & Indian mackerel: Regarding development of Fisheries Management Plan for Maharashtra.

Respected Sir,

Kindly refer our letters dated 16/01/2023, 18/04/2023, 26/07/2023 and 04/09/2023 requesting for the preparation of a Fisheries Management Plan for the state of Maharashtra for the well management of marine fisheries and thereby ensuring the sustainability of the stock and conservation of the resources with improved governess including stakeholder involvement.

The Fisheries management plan is an integral part of the FIP wherein an increased stakeholder involvement in the harvesting and post harvesting sectors to look for what needs to be done for the overall sustainability of the resources and it's utilization. The FIP is based on the Ecosystem approach to fisheries management including the adoption of the precautionary measures (via Reference Points and Harvest Control Rules). Fisheries Management Plan is an important instrument for us to move forward for the successful completion of the FIP on Indian oil sardine and Indian mackerel.

In this context, we request your good selves to persuade CMFRI Kochi for an early execution of the already prepared document and inform us the present status of the matter at the earliest so as to enable us to report the matter to the Marin Trust, our FIP certifying agency.

Thanking you,

Yours faithfully

The Commissioner of Fisheries,

Government of Maharashtra

MUMBAI 400 002

Sub: Fishery Improvement Project (FIP) on Indian oil sardine & Indian mackerel along the coast of Maharashtra & Goa- Regarding development of Fisheries Management plan for Maharashtra.

Sir,

Please recall the tele discussion today we had on the above subject and our earlier requests. As you are aware M/s Omega Fishmeal & Oil Pvt. Ltd Ratnagiri is one of the leading exporters of fishmeal & fish oil from the country. We also supply fishmeal to major aquaculture feed manufactures in India for the production of fish/shrimp feeds. The major raw material what we used for the production are Indian oil sardine & Indian mackerel caught from the waters of Maharashtra and Goa.

In order to promote the export/sale of our products abroad and in India, we commenced the "Fishery Improvement Project" (FIP) for Indian oil sardine and Indian mackerel along the coastal waters of Maharashtra, & Goa in 2017. The project's main focus is to improve the living conditions and efficiency of fishermen, better fisheries management and governance together with environmental responsibility and transparent traceability of fishery products throughout the supply chain.

This is the first FIP in India that applies to the latest version of Marin Trust Standard, which is an internationally accepted standard designed specifically for responsible fisheries according to UN FAO requirements .The Marin Trust Standard is most suitable for the marine fisheries resource management in India since Indian waters are found with multi-species fish stock. This FIP will ensure the effective management of sardine & mackerel resources for the development of fisheries aimed at maximum sustainability. It is worth mention here that our processing facility has been officially accepted into the Marin Trust Improver Programme (MARINTRUST IP) after auditing our unit. This is the first fishmeal plant in India getting such approval. The Marin Trust Improver Programme is an initiative of Marine Ingredients Certification Ltd. that was developed by the Marin Trust Governing Body Committee with the aim of encouraging factories for meeting the required standard for certification.

An update of the FIP is attached for your kind reference – Annexure 1

We would like to bring your kind notice that an effective Marine Fisheries Management Plan encompassing purse seine fisheries for small pelagic by the Department of Fisheries is essential to enable us to move forward and make our FIP successful. This is an integral part of our Fishery Action Plan. As you are aware, though India is a signatory to the FAO Code of Conduct for the Responsible Fisheries (CCRF) brought out in 1995 to serve as a guidelines for countries for the sound and effective management of fisheries resources, its compliance is not up to the expected level due to various reasons. The Code is voluntary. In order to make it India friendly, our scientists from CMFRI & CIFT developed guidelines namely Indian Marine Fisheries Code (IMFC) for the good management of the fishery by each maritime state. . CMFRI Kochi has already prepared the Management plans for the states of Gujarat, Tamil Nadu & Karnataka.

Some of the potential benefits of developing a fishery management plan for the small pelagic purse seine fisheries in Maharashtra will help the implementation of National Fisheries Policy 2017. Fishery management plan represent best practice in the following ways:

1. Provide clarity for all those involved in the fishery (including those that depend on the catch) about the objectives, rules/regulations, catch sharing arrangements and sustainability measures all work together.

2. Provide opportunities for stakeholders to be involved in the decision making process. Increasing transparency helps build support amongst interested parties as well as accountability.
3. Ensure that information collection is focused on supporting management and those that depend on the fishery.
4. Provide certainty and investment confidence for the post-harvest sector if sustainable use is achieved.

In view of the importance of good governance for a well-managed fisheries in line with our National Fisheries Policy, we request you to evolve a suitable marine fisheries management plan for purse seines for small pelagic

in Maharashtra at the earliest. This will help us to fulfill our efforts to make the FIP successful. I will be happy to visit your office on a date convenient to you for a detailed discussion on the subject.

Awaiting for your kind response at the earliest.
