Dear Sir,

We, Omega Fishmeal And Oil Private Limited were incorporated in 2011. The company has been formed to provide specialized and standard quality fish feed ingredients. The company focuses on producing the best quality of fish feed ingredients, which include Fishmeal, Fish oil, Fish silage, and Fish soluble. We are one of the leading exporters of fishmeal & fish oil from the country. We also supply fishmeal to major aquaculture feed manufacturers in India for the production of fish/shrimp feeds.

Our processing plant is located in an industrial area of Ratnagiri in the state of Maharashtra, India. Ratnagiri is a coastal fishing town and the factory is located 10 km away from the fishing port. The major raw material that we used for the production are Indian oil sardine & Indian mackerel caught from the waters of Maharashtra and Goa.

We are an EIA certified company (Approval NO- 1251). Also we are GMP+, HACCP & FSSC 22000 certified company.

We started the "Fishery Improvement Project" (FIP) for Indian oil sardine and Indian mackerel along the coastal waters of Maharashtra, & Goa in 2017. The project's main focus is to improve the living conditions and efficiency of fishermen, better fisheries management and governance together with environmental responsibility, and transparent traceability of fishery products throughout the supply chain. The Fishery Improvement Program (FIP) is a joint effort of the Government agencies and the private parties involved in the fisheries sector. Our website for Fishery Improvement Project is <http://indiasardinefip.in/>

This is the first FIP in India that applies to the latest version of the Marin Trust Standard, which is an internationally accepted standard designed specifically for responsible fisheries according to UN FAO requirements. The link of our Accepted Fishery Improvement Projects and their progress shown on the Marin Trust Website is <https://www.marin-trust.com/programme/improver-programme/accepted-fips-marintrust-ip>.

We are proud to inform you that our processing facility has been officially accepted into the Marin Trust Improver Programme (MARINTRUST IP) after auditing our unit. This is the first fishmeal plant in India to get such approval. A list of sites approved under Marin Trust IP in India can be seen on this link <https://www.marin-trust.com/resource-centre/list-certified-and-accepted-sites/accepted-sites-under-ip>.

To progress this FIP, we need joint support & co-operation from government bodies & private parties. In this regard, we want to present our project & its progress to the honourable Secretary of Fisheries. We kindly request you to please give an appointment slot in the month of July 2025 with the honourable Secretary of Fisheries.

Regards
