

By-Product assessment report

BP035

Aberdeen (Pelagia)

Report code	BP035	Date of issue	January 2026
--------------------	-------	----------------------	--------------

1. Application details		
Applicant	Aberdeen (Pelagia)	
Applicant country	United Kingdom	
2. Certification Body details		
Name of Certification Body (CB)	NSF / Global Trust Certification Ltd.	
Contact information for CB	Fisheries@nsf.org	
Assessor name	Matthew Jew	
CB internal peer reviewer name	Léa Lebechnech	
Internal peer review evaluation	Agree with evaluation	
Number of Assessment days	0.25	
Comments on the assessment	n/a	
3. Approval validity	Valid from 01/2026	Valid until 01/2027
4. Assessment cycle	Re-Approval	

5. By-product assessment outcomes

By-product species name	Flag country(ies)	Fishing Area(s)	MarinTrust approval status
Anglerfish (<i>Lophius budegassa/piscatorius</i>)	UK		Approved source with caution
Blue whiting (<i>Micromesistius poutassou</i>)	UK		Approved source with caution
Cod (<i>Gadus morhua</i>)	UK		Approved source with caution
European hake (<i>Merluccius merluccius</i>)	UK		Approved source with caution
European pilchard (<i>Sardina pilchardus</i>)	UK		Approved source with caution
Greenland halibut (<i>Reinhardtius hippoglossoides</i>)	UK		Approved source with caution
Haddock (<i>Melanogrammus aeglefinus</i>)	UK		Approved source with caution
Herring (<i>Clupea harengus</i>)	UK		Approved source with caution
Horse mackerel (<i>Trachurus trachurus</i>)	UK		Approved source with caution
Lemon sole (<i>Microstomus kitt</i>)	UK		Approved source with caution
Ling (<i>Molva molva</i>)	UK		Approved source with caution
Mackerel (<i>Scomber scombrus</i>)	UK		Approved source with caution
Megrim (<i>Lepidorhombus whiffiagonis</i>)	UK		Approved source with caution
Norwegian lobster (<i>Nephrops norvegicus</i>)	UK		Approved source with caution
Plaice (<i>Pleuronectes platessa</i>)	UK		Approved source with caution
Pollack (<i>Pollachius pollachius</i>)	UK		Approved source with caution
Saithe (<i>Pollachius virens</i>)	UK		Approved source with caution
Whiting (<i>Merlangius merlangus</i>)	UK		Approved source with caution

Guidance for on-site auditor

For the audit, the auditor will check how the facility manages by-products deemed medium risk. Any by-products downrated from high to medium risk will require additional due diligence checks.

It is important that facilities check all raw materials from and verify their suppliers especially if there is a perceived risk of sourcing from known or suspected IUU fishing activity. This requires checking supplier records or procedures in place to understand how the supplier can ensure there is no IUU in the raw material they provide. For raw materials risk rated medium, additional or more frequent checks may be required until the facility is certain that the raw materials are not from IUU fishing activity.

The audit requirements are covered in clause 2.11.3 of the MarinTrust Global Standard for Responsible Supply of Marine Ingredients (the MarinTrust Standard) and associated interpretation guidance.

Approved by-products

- No further checks are required beyond those included in the MarinTrust Standard.

Additional checks of Approved Source with Caution by-products

- Review supplier records or procedures in place.

Additional checks of by-products Approved Source with Caution via Step 3 assessment

- In addition to checks for medium risk Approved Source with Caution by-products, by-products that have had risk downgraded from high to medium at Step 3 (use **Appendix 1** to identify these by-product species), confirm that the relevant traceability information continues to be collected for this by-product. During the audit, a traceability check on any by-products downgraded from high to medium risk shall be included as part of the required traceability checks (Section 4).

Guidance for the applicant/certificate holder

The applicant/certificate holder is responsible for ensuring the relevant actions are taken to comply with the MarinTrust Standard.

The certificate holder is responsible for communicating any changes to the by-products sourced by submitting a scope extension request through the MarinTrust online Application Portal.

Appendix 1 – assessment outcomes

Step 2 Assessment Outcomes

By-product species name	Flag country(ies)	IUCN Red List	CITES Appendices	Step 2 risk status	Step 3 required?
Anglerfish (<i>Lophius budegassa/piscatorius</i>)	UK	Least concern	Not listed	Medium risk	No
Atlantic cod (<i>Gadus morhua</i>)	UK	Least concern	Not listed	Medium risk	No
Blue whiting (<i>Micromesistius poutassou</i>)	UK	Least concern	Not listed	Medium risk	No
European hake (<i>Merluccius merluccius</i>)	UK	Least concern	Not listed	Medium risk	No
European pilchard (<i>Sardina pilchardus</i>)	UK	Near threatened	Not listed	Medium risk	No
Greenland halibut (<i>Reinhardtius hippoglossoides</i>)	UK	Near threatened	Not listed	Medium risk	No
Haddock (<i>Melanogrammus aeglefinus</i>)	UK	Least concern	Not listed	Medium risk	No
Herring (<i>Clupea harengus</i>)	UK	Least concern	Not listed	Medium risk	No
Horse mackerel (<i>Trachurus trachurus</i>)	UK	Least concern	Not listed	Medium risk	No

By-product species name	Flag country(ies)	IUCN Red List	CITES Appendices	Step 2 risk status	Step 3 required?
Lemon sole (<i>Microstomus kitt</i>)	UK	Least concern	Not listed	Medium risk	No
Ling (<i>Molva molva</i>)	UK	Least concern	Not listed	Medium risk	No
Mackerel (<i>Scomber scombrus</i>)	UK	Least concern	Not listed	Medium risk	No
Megrim (<i>Lepidorhombus whiffiagonis</i>)	UK	Least concern	Not listed	Medium risk	No
Norwegian lobster (<i>Nephrops norvegicus</i>)	UK	Least concern	Not listed	Medium risk	No
Plaice (<i>Pleuronectes platessa</i>)	UK	Least concern	Not listed	Medium risk	No
Pollack (<i>Pollachius pollachius</i>)	UK	Least concern	Not listed	Medium risk	No
Saithe (<i>Pollachius virens</i>)	UK	Least concern	Not listed	Medium risk	No
Whiting (<i>Merlangius merlangus</i>)	UK	Least concern	Not listed	Medium risk	No

Step 3 Assessment Outcomes

By-product species name	Flag country(ies)	Fishing Area	Stock name	Category C Assessment Outcome	Traceability information	Step 3 Risk Outcome
Comments on Step 3 Assessment:						
N/A						

Appendix 2 – detailed assessment outcomes

(step 2 and step 3 if applicable)

Step 2 outcomes

Flag state	Risk rating	Flag score	Port score	General score	Flag State is contracting party or cooperating non-contracting party to all relevant RFMOs	‘Carded’ under EU Carding system	Flag state party to PSMA	Flag state mandatory vessel tracking for commercial seagoing fleet	WGI Governance rank
United Kingdom	Medium	2.04	2.61	1.97	1	1	1	1	93.40%

Step 3 outcomes

Category C assessment

Species name		N/A	
Fishing area and stock		N/A	
C1	Category C Stock Status - Minimum Requirements		
	C1.1	Fishery removals of the species in the fishery under assessment are included in the stock assessment process, OR are considered by scientific authorities to be negligible.	N/A
C1.1 Fishery removals of the species in the fishery under assessment are included in the stock assessment process OR are considered by scientific authorities to be negligible. N/A			N/A
C1.2 The species is considered, in its most recent stock assessment, to have a biomass above the limit reference point (or proxy), OR removals by the fishery under assessment are considered by scientific authorities to be negligible. N/A			N/A
References			

Traceability information

Information provided for Step 3 Path 1 or Path 2

Species name	N/A			
Path 1	Yes <input type="checkbox"/> No <input type="checkbox"/>			
Confirm all KDEs are provided	Yes <input type="checkbox"/> No <input type="checkbox"/>			
Path 2	Yes <input type="checkbox"/> No <input type="checkbox"/>			
Path 2 outcome	Flag country	Coastal score	Port score	Risk outcome

Guidance for Applicants/Certificate holders on improved traceability

When by-product origin cannot be made more granular than major FAO Areas, or when the source fishery is taking place in the High Seas (i.e. outside of EEZs of all relevant nations), an assessor must evaluate the Coastal and Port scores for each nation that straddles that FAO Area. This may lead to higher risk outcomes for an applicant. To mitigate that risk, better practice involves securing KDEs from the source fishery of the by-products, thereby meeting Path 1 instead of Path 2.

What does better practices look like?

Comprehensive data collection and sharing: Collect detailed information using Key Data Elements (KDEs) including vessel identification and authorisation, species, catch areas, fishing method and dates. These are defined in the MarinTrust Standard clauses 2.11.2.2 and 3.2.5.

Supply chain transparency: Maintain detailed records at each step of the supply chain, from capture to final sale, to ensure traceability.

Interoperable systems and technologies to support the collection and transfer of this information.
