

By-Product assessment report

BP037

San Vincente (Blumar SA)

Report code	BP037	Date of issue	July 2026
--------------------	--------------	----------------------	------------------

1. Application details		
Applicant	San Vicente (Blumar SA)	
Applicant country	Chile	
2. Certification Body details		
Name of Certification Body (CB)	NSF / Global Trust Certification Ltd.	
Contact information for CB	Fisheries@nsf.org	
Assessor name	Silvia Manglano Otaduy	
CB internal peer reviewer name	Matthew Jew	
Internal peer review evaluation	Agree with evaluation	
Number of Assessment days	0.5	
Comments on the assessment	None of the byproduct species listed in this assessment meet the MarinTrust definition of an Endangered, Threatened, or Protected (ETP) species; therefore, all are eligible for byproduct assessment. All species are not listed by CITES and are listed as 'Least Concern' or 'Data Deficient' by the IUCN Redlist. See Appendix 1. The flag state for this report are considered as a medium-risk score. These products are approved without the need for step 3.	
3. Approval validity	Valid from 07/2026	Valid until 07/2027
4. Assessment cycle	Re-Approval	

5. By-product assessment outcomes			
By-product species name	Flag country(ies)	Fishing Area(s)	MarinTrust approval status
<i>Trachurus murphyi</i> -Jack mackerel/jurel	Chile	FAO 87, Chilean EEZ Regions XV-X	Approved source with caution
<i>Merluccius gayi</i> - South Pacific hake	Chile	FAO 87, Chilean EEZ Regions XV-X	Approved source with caution
<i>Macruronus magellanicus</i> - Patagonian grenadier	Chile	FAO 87, Chilean EEZ Regions XV-X	Approved source with caution
<i>Merluccius australis</i> - Chile Austral hake	Chile	FAO 87, Chilean EEZ Regions XV-X	Approved source with caution
<i>Scomber japonicus</i> - Pacific chub mackerel/macarela	Chile	FAO 87, Chilean EEZ Regions XV-X	Approved source with caution

Guidance for on-site auditor

For the audit, the auditor will check how the facility manages by-products deemed medium risk. Any by-products downrated from high to medium risk will require additional due diligence checks.

It is important that facilities check all raw materials from and verify their suppliers especially if there is a perceived risk of sourcing from known or suspected IUU fishing activity. This requires checking supplier records or procedures in place to understand how the supplier can ensure there is no IUU in the raw material they provide. For raw materials risk rated medium, additional or more frequent checks may be required until the facility is certain that the raw materials are not from IUU fishing activity.

The audit requirements are covered in clause 2.11.3 of the MarinTrust Global Standard for Responsible Supply of Marine Ingredients (the MarinTrust Standard) and associated interpretation guidance.

Approved by-products

- No further checks are required beyond those included in the MarinTrust Standard.

Additional checks of Approved Source with Caution by-products

- Review supplier records or procedures in place.

Additional checks of by-products Approved Source with Caution via Step 3 assessment

- In addition to checks for medium risk Approved Source with Caution by-products, by-products that have had risk downgraded from high to medium at Step 3 (use **Appendix 1** to identify these by-product species), confirm that the relevant traceability information continues to be collected for this by-product. During the audit, a traceability check on any by-products downgraded from high to medium risk shall be included as part of the required traceability checks (Section 4).

Guidance for the applicant/certificate holder

The applicant/certificate holder is responsible for ensuring the relevant actions are taken to comply with the MarinTrust Standard.

The certificate holder is responsible for communicating any changes to the by-products sourced by submitting a scope extension request through the MarinTrust online Application Portal.

Appendix 1 – assessment outcomes

Step 2 Assessment Outcomes

By-product species name	Flag country(ies)	IUCN Red List	CITES Appendices	Step 2 risk status	Step 3 required?
<i>Trachurus murphyi</i> -Jack mackerel/jurel	Chile	Data deficient	Not listed	Medium risk	No
<i>Merluccius gayi</i> - South Pacific hake	Chile	Data deficient	Not listed	Medium risk	No
<i>Macruronus magellanicus</i> - Patagonian grenadier	Chile	Not Evaluated	Not listed	Medium risk	No
<i>Merluccius australis</i> - Chile Austral hake	Chile	Not Evaluated	Not listed	Medium risk	No
<i>Scomber japonicus</i> - Pacific chub mackerel/macarela	Chile	Least concern	Not listed	Medium risk	No

Step 3 Assessment Outcomes

By-product species name	Flag country(ies)	Fishing Area	Stock name	Category C Assessment Outcome	Traceability information	Step 3 Risk Outcome
Comments on Step 3 Assessment: Any of the species listed above require step-3 in this by-product assessment.						

Appendix 2 – detailed assessment outcomes

Step 2 outcomes

Flag state	Risk rating	Flag score	Port score	General score	Flag State is contracting party or cooperating non-contracting party to all relevant RFMOs	'Carded' under EU Carding system	Flag state party to PSMA	Flag state mandatory vessel tracking for commercial seagoing fleet	WGI Governance rank
Chile	Medium	2.33	2.39	1.9	1	1	1	1	81.13%

Step 3 outcomes

Category C assessment

Species name		None of the species require step-3 in this by-product assessment.	
Fishing area and stock		Not applicable	
C1	Category C Stock Status - Minimum Requirements		
	C1.1	Fishery removals of the species in the fishery under assessment are included in the stock assessment process, OR are considered by scientific authorities to be negligible.	Not applicable
	C1.2	The species is considered, in its most recent stock assessment, to have a biomass above the limit reference point (or proxy), OR removals by the fishery under assessment are considered by scientific authorities to be negligible.	Not applicable
Clause outcome:			Not applicable
C1.1 Fishery removals of the species in the fishery under assessment are included in the stock assessment process OR are considered by scientific authorities to be negligible. N/A			
C1.2 The species is considered, in its most recent stock assessment, to have a biomass above the limit reference point (or proxy), OR removals by the fishery under assessment are considered by scientific authorities to be negligible. N/A

Traceability information

Information provided for Step 3 Path 1 or Path 2

Species name		Any of the species listed above require step-3 in this by-product assessment.		
Path 1		Yes ☐ No ☐		
Confirm all KDEs are provided		Yes ☐ No ☐		
Path 2	Yes ☐ No ☐			
Path 2 outcome <i>Countries may be different for Coastal State and Port State.</i>	Flag country	Coastal score	Port score	Risk outcome

Guidance for Applicants/Certificate holders on improved traceability

When by-product origin cannot be made more granular than major FAO Areas, or when the source fishery is taking place in the High Seas (i.e. outside of EEZs of all relevant nations), an assessor must evaluate the Coastal and Port scores for each nation that straddles that FAO Area. This may lead to higher risk outcomes for an applicant. To mitigate that risk, better practice involves securing KDEs from the source fishery of the by-products, thereby meeting Path 1 instead of Path 2.

What does better practices look like?

Comprehensive data collection and sharing: Collect detailed information using Key Data Elements (KDEs) including vessel identification and authorisation, species, catch areas, fishing method and dates. These are defined in the MarinTrust Standard clauses 2.11.2.2 and 3.2.5.

Supply chain transparency: Maintain detailed records at each step of the supply chain, from capture to final sale, to ensure traceability.

Interoperable systems and technologies to support the collection and transfer of this information.
