

By-Product assessment report

BP057

Concarneau (Bioceval SAS)

Report code	BP057	Date of issue	August 2026
--------------------	--------------	----------------------	--------------------

1. Application details		
Applicant	Concarneau (Bioceval SAS)	
Applicant country	France	
2. Certification Body details		
Name of Certification Body (CB)	NSF / Global Trust Certification Ltd.	
Contact information for CB	Fisheries@nsf.org	
Assessor name	Deirdre Hoare	
CB internal peer reviewer name	Matthew Jew	
Internal peer review evaluation	Agree with evaluation	
Number of Assessment days	0.5	
Comments on the assessment	None of the species listed in this assessment meet the MarinTrust definition of an Endangered, Threatened, or Protected (ETP) species; therefore, all are eligible for byproduct assessment. Please refer to the table in Appendix 1 for all records of IUCN and CITES listings. As these species are sourced from French vessels, the IUU risk rating is medium and these products are approved without the need for step 3.	
3. Approval validity	August 26	August 27
4. Assessment cycle	Re-Approval	

5. By-product assessment outcomes			
By-product species name	Flag country(ies)	Fishing Area(s)	MarinTrust approval status
Albacore tuna (<i>Thunnus alalunga</i>)	France		Approved source with caution
Anglerfish (<i>Lophius budegassa/piscatorius</i>)	France		Approved source with caution
Blue ling (<i>Molva dypterygia</i>)	France		Approved source with caution
Cuckoo ray (<i>Leucoraja naevus</i>)	France		Approved source with caution
European hake (<i>Merluccius merluccius</i>)	France		Approved source with caution
European pilchard (<i>Sardina pilchardus</i>)	France		Approved source with caution
Haddock (<i>Melanogrammus aeglefinus</i>)	France		Approved source with caution
Herring (<i>Clupea harengus</i>)	France		Approved source with caution
Lesser-spotted dogfish (<i>Scyliorhinus canicula</i>)	France		Approved source with caution
Ling (<i>Molva molva</i>)	France		Approved source with caution
Mackerel (<i>Scomber scombrus</i>)	France		Approved source with caution
Pollack (<i>Pollachius pollachius</i>)	France		Approved source with caution
Pouting (<i>Trisopterus luscus</i>)	France		Approved source with caution
Red gurnard (<i>Chelidonichthys cuculus</i>)	France		Approved source with caution
Red mullet (<i>Mullus surmuletus</i>)	France		Approved source with caution
Saithe (<i>Pollachius virens</i>)	France		Approved source with caution
Spotted ray (<i>Raja montagui</i>)	France		Approved source with caution
Thornback ray (<i>Raja clavata</i>)	France		Approved source with caution
Whiting (<i>Merlangius merlangus</i>)	France		Approved source with caution

Guidance for on-site auditor

For the audit, the auditor will check how the facility manages by-products deemed medium risk. Any by-products downrated from high to medium risk will require additional due diligence checks.

It is important that facilities check all raw materials from and verify their suppliers especially if there is a perceived risk of sourcing from known or suspected IUU fishing activity. This requires checking supplier records or procedures in place to understand how the supplier can ensure there is no IUU in the raw material they provide. For raw materials risk rated medium, additional or more frequent checks may be required until the facility is certain that the raw materials are not from IUU fishing activity.

The audit requirements are covered in clause 2.11.3 of the MarinTrust Global Standard for Responsible Supply of Marine Ingredients (the MarinTrust Standard) and associated interpretation guidance.

Approved by-products

- No further checks are required beyond those included in the MarinTrust Standard.

Additional checks of Approved Source with Caution by-products

- Review supplier records or procedures in place.

Additional checks of by-products Approved Source with Caution via Step 3 assessment

- In addition to checks for medium risk Approved Source with Caution by-products, by-products that have had risk downgraded from high to medium at Step 3 (use **Appendix 1** to identify these by-product species), confirm that the relevant traceability information continues to be collected for this by-product. During the audit, a traceability check on any by-products downgraded from high to medium risk shall be included as part of the required traceability checks (Section 4).

Guidance for the applicant/certificate holder

The applicant/certificate holder is responsible for ensuring the relevant actions are taken to comply with the MarinTrust Standard.

The certificate holder is responsible for communicating any changes to the by-products sourced by submitting a scope extension request through the MarinTrust online Application Portal.

Appendix 1 – assessment outcomes

Step 2 Assessment Outcomes

By-product species name	Flag country(ies)	IUCN Red List	CITES Appendices	Step 2 risk status	Step 3 required?
Albacore tuna (<i>Thunnus alalunga</i>)	France	Least concern	Not listed	Medium risk	No
Anglerfish (<i>Lophius budegassa/piscatorius</i>)	France	Data deficient / Least concern	Not listed	Medium risk	No
Blue ling (<i>Molva dypterygia</i>)	France	Not Evaluated	Not listed	Medium risk	No
Cuckoo ray (<i>Leucoraja naevus</i>)	France	Near threatened	Not listed	Medium risk	No
European hake (<i>Merluccius merluccius</i>)	France	Least concern	Not listed	Medium risk	No
European pilchard (<i>Sardina pilchardus</i>)	France	Least concern	Not listed	Medium risk	No
Haddock (<i>Melanogrammus aeglefinus</i>)	France	Vulnerable	Not listed	Medium risk	No
Herring (<i>Clupea harengus</i>)	France	Least concern	Not listed	Medium risk	No

Lesser-spotted dogfish (<i>Scyliorhinus canicula</i>)	France	Least concern	Not listed	Medium risk	No
Ling (<i>Molva molva</i>)	France	Not Evaluated	Not listed	Medium risk	No
Mackerel (<i>Scomber scombrus</i>)	France	Least concern	Not listed	Medium risk	No
Pollack (<i>Pollachius pollachius</i>)	France	Least concern	Not listed	Medium risk	No
Pouting (<i>Trisopterus luscus</i>)	France	Least concern	Not listed	Medium risk	No
Red gurnard (<i>Chelidonichthys cuculus</i>)	France	Least concern	Not listed	Medium risk	No
Red mullet (<i>Mullus surmuletus</i>)	France	Least concern	Not listed	Medium risk	No
Saithe (<i>Pollachius virens</i>)	France	Least concern	Not listed	Medium risk	No
Spotted ray (<i>Raja montagui</i>)	France	Least concern	Not listed	Medium risk	No
Thornback ray (<i>Raja clavata</i>)	France	Near threatened	Not listed	Medium risk	No
Whiting (<i>Merlangius merlangus</i>)	France	Least concern	Not listed	Medium risk	No

Step 3 Assessment Outcomes

By-product species name	Flag country(ies)	Fishing Area	Stock name	Category C Assessment Outcome	Traceability information	Step 3 Risk Outcome
Comments on Step 3 Assessment: No species require step 3 in the By-Product Assessment Process.						

Appendix 2 – detailed assessment outcomes

(step 2 and step 3 if applicable)

Step 2 outcomes

Flag state	Risk rating	Flag score	Port score	General score	Flag State is contracting party or cooperating non-contracting party to all relevant RFMOs	'Carded' under EU Carding system	Flag state party to PSMA	Flag state mandatory vessel tracking for commercial seagoing fleet	WGI Governance rank
France	Medium	3.17	2.39	1.67	1	1	1	1	85.38%

Step 3 outcomes

Category C assessment

Species name		N/A	
Fishing area and stock		N/A	
C1	Category C Stock Status - Minimum Requirements		
	C1.1	Fishery removals of the species in the fishery under assessment are included in the stock assessment process, OR are considered by scientific authorities to be negligible.	N/A
	C1.2	The species is considered, in its most recent stock assessment, to have a biomass above the limit reference point (or proxy), OR removals by the fishery under assessment are considered by scientific authorities to be negligible.	N/A
Clause outcome:			
C1.1 Fishery removals of the species in the fishery under assessment are included in the stock assessment process OR are considered by scientific authorities to be negligible. N/A C1.2 The species is considered, in its most recent stock assessment, to have a biomass above the limit reference point (or proxy), OR removals by the fishery under assessment are considered by scientific authorities to be negligible. Guidance for Applicants/Certificate holders on improved traceability

When by-product origin cannot be made more granular than major FAO Areas, or when the source fishery is taking place in the High Seas (i.e. outside of EEZs of all relevant nations), an assessor must evaluate the Coastal and Port scores for each nation that straddles that FAO Area. This may lead to higher risk outcomes for an applicant. To mitigate that risk, better practice involves securing KDEs from the source fishery of the by-products, thereby meeting Path 1 instead of Path 2.

What does better practices look like?

Comprehensive data collection and sharing: Collect detailed information using Key Data Elements (KDEs) including vessel identification and authorisation, species, catch areas, fishing method and dates. These are defined in the MarinTrust Standard clauses 2.11.2.2 and 3.2.5.

Supply chain transparency: Maintain detailed records at each step of the supply chain, from capture to final sale, to ensure traceability.

Interoperable systems and technologies to support the collection and transfer of this information.
