Fisheries Certificate Schedule

DFPO, DPPO and SPFPO Skagerrak, Kattegat and Western Baltic Herring Fishery

Client/Certificate Holders: Danish Fisherman (DFPO), Swedish Pelagic Federation Producers Organization (SPFPO), and Danish Pelagic Producer Organization (DPPO)

Management System: The European fisheries are managed through the European Union Common Fisheries Policy (CFP). The activities of the SPPO and DPPO vessels like similar vessels across the European Union, are tracked by satellite, and their catches and landings are monitored through logbook declarations, at-sea and on-shore inspections. The principal EC Regulations relevant to the herring fishery are those that set the Total Allowable Catch and Quota for fishing fleets, specify technical restrictions for fishing activity, and restrict fishing to encourage the recovery of the depleted stocks.

Chain of Custody: Only Atlantic herring caught by DFPO, DPPO and SPFPO-registered vessels in the manner defined on this certificate shall be eligible to enter the Chain of Custody (CoC). Chain of Custody begins at landing (either directly to processing plant, or through separated overland transportation to the plant), at which point the product shall be eligible to carry the MSC logo. There are no restrictions on the certified product entering further chains of custody. The DFPO/DPPO/SPFPO Danish and Swedish herring fishery does not require its own CoC certificate.

SCHEDULE OF APPROVED VESSELS: An up to date vessel list for the DFPO and DPPO can be found at:

<http://danishmscfisheries.fiskeriforening.dk/danish-msc-eligible-vessels/> which is updated and maintained by the clients. Please see the attached list for the SPFPO approved vessels.

This schedule is the property of MRAG Americas, and its use is subject to conformance with the standards of the Marine Stewardship Council.
